

Super Highway Totems

Trueform were selected to provide information cycle infrastructure after a comprehensive procurement process to design, manufacture and install a number of new secure design cycle facilities throughout Greater London.

The design, which was done in partnership with the scheme designers, involved the use of high quality materials and finishes to provide users a secure, robust, vandal resistant and aesthetically appealing to promote cycle use around London.

These simple but elegant units provide all the information required for the regular bike user. Each unit has detailed mapping panel of the area showing which routes to take and directi

All work was carried out in-house at our head office in Hayes, Middlesex. onal paths.
