ABOUT US

Founded in 1975, Trueform are a leading specialist engineering company with an annual turnover in excess of £25M and over 40 years of demonstrable experience within the commercial, residential, transport, retail, airports, stadiums, education, leisure and infrastructure sectors.

Trueform specialise in the design, manufacture, supply, delivery and installation of bespoke architectural metalwork, structural steelwork (primary & secondary), sheet metalwork and a wide range of architectural glass and glazing systems, including bomb blast resistant solutions for canopies, wall linings & balustrades.

Working with major clients, architects and contractors, Trueform meets the individual needs of customers who expect the very best.

Our 125,000 sq/ft manufacturing and product finishing facilities in West London house some of the most advanced CNC manufacturing equipment available in the industry, operated by a highly experienced and skilled workforce, and supported by a network of additional depots strategically located throughout the UK. With overseas divisions in North America and the Middle East, Trueform offers worldwide experience certified quality service and support in every project phase.

Our scope of work includes technical sales advice, budget pricing, tendering, CAD design, engineering, manufacture, finishing, supply and site installation/ fitting of all types of construction related fabricated metalworks and architectural glazing.

SPECIALIST AREAS OF OPERATION

- Architectural Metalwork
- Structural Steelwork
- Bespoke Fabricated Metalwork
- Sheet Metalwork
- Canopies & Walkways
- Architectural Glass And Glazing Systems
- Construction Related Metal Fabrication Services
- Signage & Street Furniture

SECTORS SERVED

- Commercial & Residential
- Airport, Bus & Rail Transport Infrastructure
- Stadiums & Infrastructure
- Education & Leisure

IN-HOUSE SERVICES PROVIDED

- CAD Design
- Structural Engineering
- Manufacture & Fabrication
- Pre-Treatment & Specialist Finishing
- Surveying
- Civils, Groundworks & Reinstatement
- Installation, Site Fitting & Steel Erection
- Modular Construction and Site Erection
- Electrical Connection (Lloyds NERS Accredited)
- Project Management Services

Architraves & Skirting

Metal Fabrication Services & Fabricated Products

Manufacture

Based in Hayes, West London, our 125,000 sq/ft manufacturing and product finishing facilities house some of the most advanced, modern, CNC metalwork manufacturing and laser processing equipment available in the industry, operated by a highly experienced and skilled workforce. Trueform are able to work with all grades of ferrous and non-ferrous metal.

Utilising fully computerised MRP production planning systems, Trueform are able to provide guaranteed and assured delivery for all components and services, which are fully aligned to client's construction programmes. In-house facilities and 24/7 working enables us to react rapidly when required, with great flexibility, day or night.

Trueform's combined expertise in design, engineering, fabrication, sheet metal component and sub-assembly development, product finishing and site erection can help our customers to minimize programme time by identifying, reducing or eliminating problems with production by producing total engineering solutions.

Fabricated Fascias & Signage

Bespoke Fabricated Structures

MANUFACTURING CELLS

- Laser Cutting & Processing
- CNC Machining
- CNC Punching
- Folding And Forming
- Welding
- Steelwork Fabrication
- Fabrication
- Assembly
- Pre-Treatment And Finishing
- Signage Graphic Department
- Pre-Treatment & Specialist Finishing

PRE-TREATMENT & FINISHING

Trueform provide a wide range of architectural pre-treatment and specialist finishing services, including:-

- Galvanising
- Achroming
- Anodising
- Shot blasting
- Stainless steel shot peening
- Powder coating
- Electroplating & Electro-polishing
- Specialist painting & finishing

PRODUCTS & CUSTOM FABRICATED SERVICES

Trueform provide a full turnkey service for all architectural, fabricated metalwork and glass components including:-

- Architraves & Skirting
- Balustrades & Handrails
- Balustrade Infill Panels
- Bars / Counters
- Bonded Fascias
- Bridges & Walkways
- Brise Soleil
- Bull Nosing & Feature Flashing
- Canopies & Walkways
- Ceiling Panels & Cladding Panels
- Column Cladding
- Curved Fascias
- Digital displays
- Elevators, Escalators & Moving Walkways
- Glazed Screens
- Glazing Support Systems (Bespoke)
- Laser Cutting
- Louvres & Grills
- Machined Parts
- Mesh Panels & Screens
- Mezzanines
- Panels & Perforated Panels
- Rainwater Guttering Systems
- Sections & Profiles
- Sheet Metalwork
- Signage systems and signage graphics
- Staircases
- Stair Treads, Trims & Handrails

Project Management

Trueform's experienced, well-trained and disciplined project managers follow proven project management procedures. Utilisation of leading planning and management tools gives Trueform full control of quality, cost and programme and ensures successful project management.

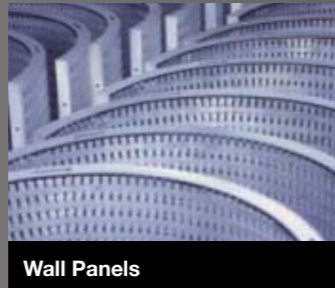

Strict adherence to all company quality and health and safety processes ensures a high quality product and a safe working site. Trueform are able to give an individual response to the needs of each project and respond quickly and accurately to changes wherever they occur.

Design & Installation

Design & Engineering Expertise

Trueform's large 'In House' design and engineering team is experienced in all aspects of Architectural Metalwork, Sheet Metalwork, Structural Steelwork and Architectural Glass.

Trueform operate the very latest 2D & 3D BIM enabled CAD software, which is fully integrated with our CNC manufacturing equipment.

With over 40 years of experience in the design of complex, multi-stage architectural metalwork and steelwork projects, Trueform have the required expertise to undertake full design responsibility, or to assist our clients in the joint collaborative development of existing concepts and designs into fully finished, compliant, value engineered solutions with fully detailed manufacturing and site installation drawings, whilst maintaining the original design intent and aesthetic appearance.

From conception through to final site erection/installation and client handover, Trueform are able to provide the necessary design assurances and documentation, including the production of 'as built' drawings for incorporation into operation and maintenance manuals and the project Health & Safety files.

All of Trueform's design team are fully conversant with their responsibilities and duties under the CDM (Construction Design and Management) Regulations 2015.

Case Studies

For over 40 years Trueform has had the pleasure of working with some of the World's leading architects, designers and construction companies on the many of the UK's landmark buildings and constructions.

Trueform's work is some of the best examples of contemporary architectural metalwork, and architectural glazing available anywhere in the industry. Our continued growth and first class reputation is testament to a dedicated commitment to customer service, quality and value for money services.

Please visit our website for a detailed portfolio of recently completed case studies.

Balustrades & Handrails

Installation, Site Erection and Fitting Services – Optional

In addition to supply only services, Trueform provide a full range of civils, site installation and steel erection services. Our large, directly employed workforce is fully trained and qualified for all site installation and steelwork erection activities, with a wealth of experience operating on complex multi face constructions sites.

Trueform also employs modular construction methods which allows the construction of technically complex fabricated metalwork to be undertaken by off-site manufacturing techniques. Factory fabricated and assembled, the parts are then broken down, packaged and shipped to site. After delivery, the components can be assembled allowing reduced site occupancy times.

SITE INSTALLATION SERVICES INCLUDE:-

- Groundwork's and Civils
- Concrete foundation works
- Site survey (intrusive and non-intrusive)
- Installation & Erection
- Steel erection
- Finished floor reinstatement
- Site management & supervision

STREETWORKS SERVICES INCLUDE:-

- Traffic management services (NRSWA Certified)
- NRSWA Opening Notices
- Utility stat plans
- Electrical connection & testing services (Lloyds NERS Accredited)
- Groundworks and finished floor reinstatement
